

Company: Prometheus Deutschland GmbH (Member of the Puerto Fantasia Group)

Job Opportunity: Digitalization & Data Management Manager

Location: Collenberg, Bavaria, Germany

Department: IT & Digital Infrastructure

Reports to: Director of IT & Digitalization

Type: Full-time | Management Level

Start Date: As soon as possible

About Us

Prometheus Deutschland GmbH serves as the digital and strategic nucleus of the Puerto Fantasia Group – one of the most forward-looking hospitality and resort companies worldwide. Based in Collenberg, Germany, we oversee digital systems, automation, and data-driven decision-making across all group entities in Europe and Asia.

Your Role

As Digitalization & Data Management Manager, you will lead the transformation of business processes through smart technologies and ensure consistent, secure, and actionable data flows across departments. Your mission is to build digital bridges between teams, systems, and insights – enabling faster decisions, higher efficiency, and scalable solutions.

Key Responsibilities

- Drive the implementation of digital workflows, platforms, and tools across departments.
- Manage group-wide data architecture, including storage, access control, and integration.
- Standardize data management policies and reporting structures in line with GDPR and internal governance.
- Support digital transformation initiatives in finance, HR, legal, and operations.
- Coordinate with external software vendors and internal stakeholders on systems integration.

- Maintain data quality, consistency, and availability for decision-makers and reporting.
- Work closely with the IT Systems & Security Manager on secure and efficient infrastructure.
- Track KPIs related to digital performance, automation benefits, and process efficiency.

Requirements

- 4-7 years of experience in digital transformation, process automation, or data management.
- Strong understanding of business software, APIs, cloud platforms, and digital tools.
- Experience with data governance frameworks, dashboards, and analytics tools (e.g. Power BI, Tableau).
- Ability to translate complex processes into streamlined, tech-enabled solutions.
- High attention to detail, documentation, and compliance (esp. with GDPR).
- Degree in Business Informatics, IT, Data Science, or similar fields.
- Fluency in German and English; additional languages are a plus.

What We Offer

- Strategic position at the intersection of technology, operations, and innovation.
- High autonomy and direct impact on the group's digital landscape.
- Modern work environment with hybrid flexibility and flat hierarchies.
- Competitive salary and opportunities for growth and specialization.
- A chance to shape the digital DNA of an international leisure group.

How to Apply:

Online Application Process: You can also submit your application via the official application form on our website. [Apply here](#)
